

GENERATION

Steady Strength, Focused Support

With a restrained sense of power, stable structure, and multidimensional adjustment capabilities, it meets the demands of extended sitting comfort in modern office environments.

Design Philosophy

The GT series is not only designed for striking visual impact; instead, it addresses modern office needs in a subtle yet effective manner—providing stability, seamless fit, adjustable features, and suitability for extended use.

Every structural element is tailored to accommodate with various sitting postures, while each adjustment aims to restore the body to its most natural position.

Less Statement
More Support

Ergonomic Support

Adaptive support caters to your body; there's no need for compromise

Self-Adaptive Backrest Structure

The rally suspension elastic valve works in conjunction with the flexible back frame to absorb shock forces when the seat back is twisted and converted into support points during tilting movements.

Functional Details

Details, made for extended comfort.

Height Adjustable Lumbar Support

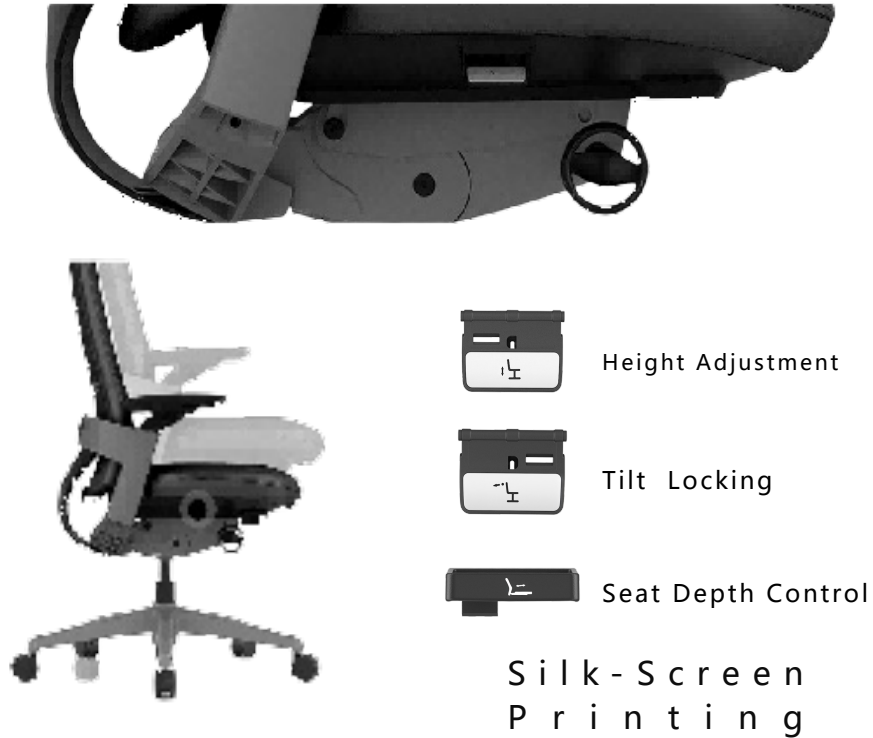

With extensive lumbar protection and support

Adjust Freely

Synchronous Recline 4-Position Lock
Wire Control Mechanism

Four position locking | Synchronized tilt | Wire control mechanism | Side-tension adjustable knob for back-tilt adjustment, simple and efficient operation.
