LINEA X MEET

Designed By: Oficio

LINEA X MEET was designed to create meeting spaces that feel connected, adaptable, and effortlessly functional. Developed for the evolving workplace, it brings together refined aesthetics and practical performance, encouraging collaboration while maintaining a clean, architectural presence.

Defined by its distinctive European-designed rectangular splay legs, LINEA X MEET delivers a confident visual identity with exceptional stability and generous legroom. The angled profile creates a sense of openness beneath the table, giving larger meeting settings a lighter, more considered appearance. Every detail has been carefully resolved to achieve a balance of strength, simplicity, and enduring style.

Versatility sits at the heart of the design. Available in a wide range of tabletop sizes, finishes, and configurations, LINEA X MEET adapts seamlessly to boardrooms, collaborative spaces, project areas, and informal meeting environments. Integrated power and cable management keep technology organised and accessible, ensuring every workspace remains clean, connected, and ready for productive conversations.

LINEA X MEET is designed to support the way modern teams come together. Combining thoughtful engineering with timeless European design, it provides a versatile foundation for collaboration, decision-making, and the exchange of ideas in workplaces built for the future.
