

LINEA A MEET

Designed By: Oficio

LINEA A MEET was designed to bring clarity, balance and energy to the meeting space. We wanted to create a table that felt open and purposeful, one that would encourage movement, conversation and clear thinking.

The angled steel legs give LINEA A MEET its distinctive stance. Strong, architectural and refined, they lift the table visually and bring a sense of lightness to even larger formats. Every line was considered to feel intentional, not ornamental. It is a piece that holds presence without overpowering the room.

Functionality was central to the design. With seamless power integration, a variety of top sizes and finishes, and precise detailing throughout, LINEA A MEET performs effortlessly in both formal and informal settings. It adapts with ease, whether in a boardroom, creative studio or shared workspace.

LINEA A MEET is a table that supports the rhythm of modern work. Designed to elevate collaboration, it brings structure, flexibility and a refined material palette to any interior.

Product Description
