

## PE DISCO

Designed By: Oficio

PE DISCO was designed to simplify the workspace without compromising on style or function. At its core is a clean, disc-shaped base that gives the table its name. It is a solid, minimal anchor that supports a wide variety of top shapes, sizes and finishes.

The intention was to create a table that works hard without demanding attention. Its quiet geometry makes it adaptable, while its strong presence brings clarity and cohesion to any setting. Whether used as a café table, side table or meeting point, PE DISCO feels considered and complete.

Available in a selection of refined powdercoat colours or polished stainless steel, the base can either blend into the environment or become a bold, sculptural element. Paired with premium 25mm tops, it can shift between formal and casual with ease.

PE DISCO was designed with flexibility in mind. It is timeless in form, durable in construction and crafted to suit the ever-evolving needs of modern spaces.

# Product Description
